

MONTGOMERY COUNTY COVID VACCINE PASSPORT PROPOSAL

I am writing to state that I am very strongly opposed to this proposal for several reasons

The COVID vaccine injections do not prevent illness or transmission of the disease so it has little public health basis.

We already have a very high number of doses that have been given in the county so it is doubtful that it will increase that rate.

This is discriminatory to those who cannot take it for various reasons or for those who may have developed natural immunity.

This will place a burden on businesses to have to have a person at their door to check these documents.

People may take their business to another county.

I can't see that it will achieve anything in the realm of public health.
